## **ACKNOWLEDGMENTS**

Acknowledgments are optional. If included, please consider the following general guidelines for acknowledging contributions to your project:

- It is the responsibility of a student to acknowledge sources of his or her ideas and information. For example, if a student publishes a paper written for a particular professor, that individual should be acknowledged.
- The significant contribution of any individual or group to a published work should be acknowledged within that work, by inclusion of the name of the individual or the group and, if appropriate, by a brief identification of the nature of the contribution. This recognition may be in the form of an acknowledgment in the body of the work, or in a prominent footnote.
- When possible, the nature of the acknowledgment should be agreed upon in writing by the contributor and principal author, prior to submission of the work for publication. If there is to be remuneration for a publication, those who contributed significantly to the work should be so informed and a contractual agreement reached prior to publication concerning the distribution of the compensation.
- Acknowledging the support of family and friends
- Acknowledgments should not extend more than one page.

## **ABSTRACT**

The abstract should briefly tell the reader what the dissertation is about. It is a concise summary of the important points of the report. The student should summarize the key points of the document, including the problem, the research question, the methodology, and the results. The abstract should be about 400 words and should not exceed more than two pages. It is recommended that you write the abstract after you have completed your report.

## **DECLARATION**
