ABSTRACT

8 Abstract text here.

AUTHOR SUMMARY

9 Author Summary here.

10 [Body of article. See NETNSample.tex for examples of all of the elements available for use in an
11 NETN manuscript, including text boxes, lists, citations and references, and Technical Terms.]

ACKNOWLEDGMENTS

12 The Funder and award ID information you input at submission will be introduced by the publisher under
13 a Funding Information head during production. Please use this space for any additional
14 acknowledgements and verbiage required by your funders.

SUPPORTING INFORMATION

15 This is an optional section. Please use this space to provide information about any supporting information
16 referred to in your manuscript.

COMPETING INTERESTS

17 This is an optional section. If you declared a conflict of interest when you submitted your manuscript,
18 please use this space to provide details about this conflict.

TECHNICAL TERMS

19 All NETN article types require Technical Terms.

20 Identify approximately 10 key terms that are mentioned in your article and whose usage and definition
21 may not be familiar across the broad readership of the journal. Provide brief (20-word or less) definitions
22 for each term, avoiding in these definitions the use of jargon, or highly technical or specialized language.
23 When the article is typeset, the Technical Terms will appear in the margins at or near their first mention in
24 the text.

25 In your manuscript, bold the first occurrence of each **Technical Term** and then provide a list of the
26 terms and their definitions at the end of the manuscript after the references.

TECHNICAL TERMS

27 **Technical Term** a key term that is mentioned in an NETN article and whose usage and definition may
28 not be familiar across the broad readership of the journal.

29 **Technical Term** a key term that is mentioned in an NETN article and whose usage and definition may
30 not be familiar across the broad readership of the journal.

31 **Technical Term** a key term that is mentioned in an NETN article and whose usage and definition may
32 not be familiar across the broad readership of the journal.

33 **Technical Term** a key term that is mentioned in an NETN article and whose usage and definition may
34 not be familiar across the broad readership of the journal.
