1.2 Research Problem

to insert Figure

An example how to insert a figure, as shown below

Figure 1.1: UOJ LOGO

to insert Multiple Figures horisntal

Figure 1.2: title of figure

(a) title a

(b) subtitle of second figure

to insert Multiple Figures with vertical space

1.3 Research Objective

to insert Numbered enumerate

Figure 1.3: title of figure

(a) title a

(b) subtitle of second figure

In order to achieve this aim the following objectives have been laid,

- (i) Objective 1
- (ii) Objective 2
- (iii) Objective 3

to insert Bulleted List

In order to achieve this aim the following objectives have been laid,

- Objective 1
- Objective 2
- Objective 1

to insert a simple Table with a caption below to insert Table with marge cells

entry 1	entry2
entry1	entry 2

Table 1.1 : the firs Caption

Table 1.2 : Binary confusion matrix

Actual class	predicated class	
	Postiave	Negative
positive	TP	FN
Negative	FP	TN

1.4 Importance of Research

1.5 Research Limtation

1.6 Terminology of Research

to insert symbols

+

θ

α

Ω

to insert acronyms

Kingdom of Saudi Arabia (KSA)

Kingdom of Saudi Arabia

KSA

University of Jeddah (UOJ) , UOJ , University of Jeddah

United Nations Educational Scientific & Cultural Organization (UNESCO)

The World Health Organization (WHO)

1.7 Outline Research

The thesis has been organized into five chapters and an overview of these chapters is given below,

i) Chapter1 describes the

ii) Chapter2 provides a comprehensive review of

iii) Chapter3 presents a

iv) Chapter4 deals with

v) Chapter5 presents a

Chapter II

Basic Concepts and Literature Review

2.1 Introduction

2.2 Basic Concepts and Definitions

2.3 The Literature Review

Chapter II

Basic Concepts and Literature Review

2.1 Introduction

to insert simple equation

This is a simple math expression $\sqrt{x^2 + 1}$ inside text. And this is also the same: $\sqrt{x^2 + 1}$ but by using another command .

$$\sqrt{x^2 + 1} \tag{2.1}$$

$$VI(x_i) = \frac{1}{k} \left[1 - \sum_{k=1}^K Gini(i)^k \right] \tag{2.2}$$

$$\Omega = \begin{bmatrix} \sigma_{11} & \dots & \sigma_{J1} \\ \vdots & \ddots & \vdots \\ \sigma_{J1} & \dots & \sigma_{JJ} \end{bmatrix} \tag{2.3}$$

$$y_i = j \quad \text{if} \quad y_{ij}^* = \begin{cases} 1 & \text{if } y_{i1}^* = \max(y_{i1}^*, \dots, y_{ij}^*) \\ \vdots & \\ j & \text{if } y_{ij}^* = \max(y_{i1}^*, \dots, y_{ij}^*) \end{cases} \tag{2.4}$$

to insert equation without numbering

$$VI(x_i) = \frac{1}{k} \left[1 - \sum_{k=1}^K Gini(i)^k \right]$$

$$\Omega = \begin{bmatrix} \sigma_{11} & \dots & \sigma_{J1} \\ \vdots & \ddots & \vdots \\ \sigma_{J1} & \dots & \sigma_{JJ} \end{bmatrix}$$

$$y_i = j \quad \text{if} \quad y_{ij}^* = \begin{cases} 1 & \text{if } y_{i1}^* = \max(y_{i1}^*, \dots, y_{ij}^*) \\ \vdots \\ j & \text{if } y_{ij}^* = \max(y_{i1}^*, \dots, y_{ij}^*) \end{cases}$$

$$2x - 5y = 8$$

$$3x + 9y = -12$$

$$2x - 5y = 8$$

$$3x + 9y = -12 \tag{2.5}$$

$$2x - 5y = 8 \tag{2.6}$$

$$3x + 9y = -12 \tag{2.7}$$

2.2 Basic Concepts and Definitions

2.3 The Literature Review

Yu et al. (2018) Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Guerra et al. (2021) The past decades have witnessed tremendous progress in biomaterials in terms of functionalities and applications. To realize various functions such as tissue engineering, tissue repair, and controlled release of therapeutics, a biocompatible and biologically active material is often needed. However, it is a difficult task to find either synthetic or natural materials suitable for in vivo applications. Nature has provided us with the natural rubber latex from the rubber tree *Hevea brasiliensis*, a natural polymer that is biocompatible and has been proved as inducing tissue repair by enhancing the vasculogenesis process, guiding and recruiting cells responsible for osteogenesis, and acting as a solid matrix for controlled drug release. It would be extremely useful if medical devices can be fabricated with materials that have these biological properties.

It would be extremely useful if medical devices can be fabricated with materials that have these biological properties (Guerra et al., 2021; Yu et al., 2018) .
